Office Action Summary

Art Unit: 2174

### DETAILED ACTION

1. The election was received on 8/19/02. Per applicant's request, claims 39-40, 50-53, and 63-66 are elected without traverse.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 39-40, 50-53, 63-66 are rejected under 35 U.S.C. 102(e) as being anticipated by Krishnamurthy et al (6389464).

Art Unit: 2174

4. Regarding claim 39, Krishnamurthy et al show: an SNMP agent with direct access to configuration data (column 4 lines 44-54), a combined HTTP and SNMP manager only accessing configuration data by communicating with the SNMP agent (column 9 lines 1-24, column 13 lines 16-36), a combined text interface generator and HTTP client only accessing configuration data by requesting the combined HTTP server and SNMP manager to communicate with the SNMP agent (column 11 lines 45-56, column 13 lines 30-45) so that all safety mechanisms are built into the agent for security (column 9 lines 1-10).

5. Regarding claim 40, the combined HTTP server and SNMP manager generates HTML documents with anchors that contain identifiers for MIB objects (column 6 lines 27-45, column 10 lines 47-60). The combined generator and HTTP client transmits messages containing identifiers for MIB objects in response to user input (column 12 lines 20-36).

6. Regarding claims 52-53, Krishnamurthy et al show a user interface with a text menu system (Figures 5-6 for example).

7. Claims 50-51 and 63-66 show the same features as above and are rejected for the same reasons.

Art Unit: 2174

8. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
